

CLINICAL
Homeopathic
COLLEGE

Year 1 Book List

I have been excited to negotiate a book discount for all of you who will need to purchase or supplement your library. These books may be purchased as a set new by contacting:

**Dana Ullman at Homeopathic Educational Services at 510-649-0294, or through his website
www.Homeopathic.com**

Dana does a lot to support homeopathy and provide the research materials that we will be referring to over the 2-year course. Prices for the books are discounted for this course. The shipping will not exceed \$15 or be sure to inquire about 'flat rate' boxes or media rate, which for books, are a good deal if you use another source.

The focus for Year 1 is understanding homeopathy (theory) its affinity for your client by identifying what, in fact, is the nature and origin of disorder while embracing the healing quality of the remedies (through the dynamic of proving's and clinically cured cases). The Clinical College Program will require the following textbook selections.

Year-1 reading assignments will be primarily from the following great books:

1. **Organon of the Medical Art** by Samuel Hahnemann and interpreted by Wenda Brewster O'Reilly The 6th edition of the original Organon is substantially less expensive but a can be a challenge to apply, but that will lead to a great discussion in class! Pick the one that fits your budget.
2. **Chronic Diseases a Cause and Cure Authored** by Ghatak translated by Banerjee
3. **Homeopathic Clinical Repertory 3rd Edition** by Robin Murphy (red)
4. **Natures Materia Medica** by Robin Murphy 3rd Edition (red)
5. **Repertory** by Robin Murphy
6. **Homeopathic Emergency Guide** by Thomas Kruzel
7. **Saying No to Vaccines** by Dr. Sherry Tenpenny
8. **Sensations as if** by Roberts (have in office)
9. **Homeopathic Dictionary & Holistic Health Reference** by Yaskers
10. **Soul of Remedies** by Rajan Sankaran *This book is hard to get*
11. **Homeopathic Revolution** by Dana Ullman
12. **Homeopathy and Minerals** by Jan Scholten
13. **Divided Legacy - 3rd edition** (Important to understand the history of U.S. Medicine)
14. **Science of Homeopathy** by George Vithoulkas (Look for a used one. Prices are up due to shipping and the Greek \$. This book used to be \$20-25 vs. \$50 today. Look around first and let us know if you find a good price for others.)

CLINICAL
Homeopathic
COLLEGE

Year 1 Book List (cont.)

The following books may be purchased used and more likely found at a common book supplier:

1. **Merck Manual** (describes Medically Diagnosed Conditions and Recommended medical treatments and is very handy in understanding diagnosed diseases.
2. **PDR** (up to 5 years old) Lists drugs and their side effects. Often medicated clients want relief of the new disease condition when it could be in fact from their meds. This is good resource.
3. **Everyday Miracles: Homeopathy in Action** - Autographed by Linda Johnston [Provided by Ellen as a special gift to you.]

The focus for Year-2 Materia Medica (learning remedies healing qualities) by Kingdoms (animal, vegetable, and mineral). We will also be embracing the healing qualities of nosodes beyond their use as immunizations. The books available are fabulous tools and the classes just as good!

I look forward to working with all of you interested and motivated to learn Homeopathy!

- Ellen Bench
